**A Course in Differential Geometry (Graduate Texts in Mathematics) By W. Klingenberg**

This English edition could serve as a text for a first year graduate course on differential geometry, as did for a long time the Chicago Notes of Chern mentioned in the Preface to the German Edition. Suitable references for ordinary differential equations are Hurewicz, W. Lectures on ordinary differential equations. MIT Press, Cambridge, Mass., 1958, and for the topology of surfaces: Massey, Algebraic Topology, Springer-Verlag, New York, 1977. Upon David Hoffman fell the difficult task of transforming the tightly constructed German text into one which would mesh well with the more relaxed format of the Graduate Texts in Mathematics series. There are some elaborations and several new figures have been added. I trust that the merits of the German edition have survived whereas at the same time the efforts of David helped to elucidate the general conception of the Course where we tried to put Geometry before Formalism without giving up mathematical rigour. I wish to thank David for his work and his enthusiasm during the whole period of our collaboration. At the same time I would like to commend the editors of Springer-Verlag for their patience and good advice. Bonn Wilhelm Klingenberg June, 1977 vii From the Preface to the German Edition This book has its origins in a one-semester course in differential geometry which I have given many times at Gottingen, Mainz, and Bonn.

### Editorial Review

Language Notes

Text: English, German (translation)

### Users Review

#### From reader reviews:

##### Shawn Macdonald:

Now a day folks who Living in the era wherever everything reachable by match the internet and the resources included can be true or not require people to be aware of each data they get. How people have to be smart in getting any information nowadays? Of course the correct answer is reading a book. Examining a book can help men and women out of this uncertainty Information particularly this A Course in Differential Geometry (Graduate Texts in Mathematics) book since this book offers you rich information and knowledge. Of course the knowledge in this book hundred % guarantees there is no doubt in it you probably know this.

##### Richard Davy:

Nowadays reading books become more and more than want or need but also turn into a life style. This reading habit give you lot of advantages. The advantages you got of course the knowledge even the information inside the book that improve your knowledge and information. The info you get based on what kind of publication you read, if you want have more knowledge just go with education and learning books but if you want feel happy read one using theme for entertaining such as comic or novel. The particular A Course in Differential Geometry (Graduate Texts in Mathematics) is kind of reserve which is giving the reader erratic experience.

##### Amber Tyson:

Reading can called thoughts hangout, why? Because when you are reading a book mainly book entitled A Course in Differential Geometry (Graduate Texts in Mathematics) your head will drift away trough every dimension, wandering in most aspect that maybe unidentified for but surely will end up your mind friends. Imaging just about every word written in a publication then become one form conclusion and explanation which maybe you never get ahead of. The A Course in Differential Geometry (Graduate Texts in Mathematics) giving you a different experience more than blown away the mind but also giving you useful information for your better life within this era. So now let us show you the relaxing pattern this is your body and mind are going to be pleased when you are finished examining it, like winning a casino game. Do you want to try this extraordinary investing spare time activity?

**Cora Blanchette:**

Don't be worry should you be afraid that this book will probably filled the space in your house, you can have it in e-book technique, more simple and reachable. This kind of A Course in Differential Geometry (Graduate Texts in Mathematics) can give you a lot of good friends because by you investigating this one book you have factor that they don't and make anyone more like an interesting person. This book can be one of a step for you to get success. This e-book offer you information that perhaps your friend doesn't recognize, by knowing more than different make you to be great men and women. So , why hesitate? Let us have A Course in Differential Geometry (Graduate Texts in Mathematics).
