Representations of Semisimple Lie Algebras in the BGG Category \mathscr{O} (Graduate Studies in Mathematics) By James E. Humphreys

This is the first textbook treatment of work leading to the landmark 1979 Kazhdan-Lusztig Conjecture on characters of simple highest weight modules for a semisimple Lie algebra \mathfrak{g} over \mathbb{C} . The setting is the module category \mathscr{O} introduced by Bernstein-Gelfand-Gelfand, which includes all highest weight modules for \mathfrak{g} such as Verma modules and finite dimensional simple modules. Analogues of this category have become influential in many areas of representation theory. Part I can be used as a text for independent study or for a mid-level one semester graduate course; it includes exercises and examples. The main prerequisite is familiarity with the structure theory of \mathfrak{g} . Basic techniques in category \mathscr{O} such as BGG Reciprocity and Jantzen's translation functors are developed, culminating in an overview of the proof of the Kazhdan-Lusztig Conjecture (due to Beilinson-Bernstein and Brylinski-Kashiwara). The full proof however is beyond the scope of this book, requiring deep geometric methods: D -modules and perverse sheaves on the flag variety. Part II introduces closely related topics important in current research: parabolic category \mathscr{O} , projective functors, tilting modules, twisting and completion functors, and Koszul duality theorem of Beilinson-Ginzburg-Soergel.

Editorial Review

Review

"One of the goals Humphreys had in mind was to provide a textbook suitable for graduate students. This has been achieved by keeping prerequisites to a minimum, by careful dealing with technical parts of the proofs, and by offering a large number of exercises." ---- Mathematical Reviews

Users Review

From reader reviews:

Luis Garcia:

Nowadays reading books are more than want or need but also be a life style. This reading addiction give you lot of advantages. Associate programs you got of course the knowledge even the information inside the book that improve your knowledge and information. The knowledge you get based on what kind of guide you read, if you want send more knowledge just go with education and learning books but if you want feel happy read one having theme for entertaining including comic or novel. Often the Representations of Semisimple Lie Algebras in the BGG Category \mathscr{O} (Graduate Studies in Mathematics) is kind of reserve which is giving the reader unstable experience.

Stewart Ramirez:

The book Representations of Semisimple Lie Algebras in the BGG Category \mathscr{O} (Graduate Studies in Mathematics) will bring that you the new experience of reading any book. The author style to elucidate the idea is very unique. Should you try to find new book to see, this book very appropriate to you. The book Representations of Semisimple Lie Algebras in the BGG Category \mathscr{O} (Graduate Studies in Mathematics) is much recommended to you to see. You can also get the e-book through the official web site, so you can quickly to read the book.

Gregory Medina:

This Representations of Semisimple Lie Algebras in the BGG Category \mathscr{O} (Graduate Studies in Mathematics) is great reserve for you because the content and that is full of information for you who have always deal with world and get to make decision every minute. This particular book reveal it info accurately using great arrange word or we can say no rambling sentences inside it. So if you are read the item hurriedly you can have whole info in it. Doesn't mean it only offers you straight forward sentences but difficult core information with beautiful delivering sentences. Having Representations of Semisimple Lie Algebras in the BGG Category \mathscr{O} (Graduate Studies in Mathematics) in your hand like keeping the world in your arm, data in it is not ridiculous a single. We can say that no e-book that offer you world throughout ten or fifteen moment right but this publication already do that. So , this can be good reading book. Hi Mr. and Mrs. busy do you still doubt that?

Jack Murray:

The book untitled Representations of Semisimple Lie Algebras in the BGG Category \mathscr{O} (Graduate Studies in Mathematics) contain a lot of information on the idea. The writer explains your girlfriend idea with easy method. The language is very simple to implement all the people, so do certainly not worry, you can easy to read it. The book was published by famous author. The author will take you in the new age of literary works. You can read this book because you can keep reading your smart phone, or gadget, so you can read the book in anywhere and anytime. In a situation you wish to purchase the e-book, you can open their official web-site and also order it. Have a nice study.
