

Wearable Android: Android Wear and Google FIT App Development

By Sanjay M. Mishra

Wearable Android: Android Wear and Google FIT App Development By Sanjay M. Mishra

Software Development/Mobile/Android/Wearable/Fitness

Build "Wearable" Applications on the Android Wear and Google Fit Platforms

This book covers wearable computing and wearable application development particularly for Android Wear (smartwatches) and Google Fit (fitness sensors). It provides relevant history, background and core concepts of wearable computing and ubiquitous computing, as a foundation for designing/developing applications for the Android Wear and Google Fit platforms. This book is intended for Android wearable enthusiasts, technologists and software developers.

- Gain insight into “wearables” in the modern consumer ecosystem of a multitude of devices, ubiquitous computing, cloud computing and intelligent personal assistants
- Learn the Android Wear and Google Fit APIs and jump-start hands-on development including: setting up an Android development environment suitable for Android Wear and Google Fit , setting up smartwatch and fitness devices for development and debugging , writing applications that install and execute on Android Wear (smartwatch) devices , and applications that run on your handheld Android devices and find and connect to fitness sensors and access fitness data, and more
- Catch up with the new Android 5.0 “Lollipop”, Android Studio and the gradle based build system

Learn how to write applications for smart watches and fitness sensors on the Android/Google ecosystem.

“Sanjay’s tome provides a comprehensive and timely treatment of the essential points of current Wearable technology and Android Wearable development techniques. The easygoing and comprehensive examples make this book a joy to discover and a delight to peruse. Highly recommended!”

- Rudi Cilibrasi, Computer Scientist

“The text provides a rich and immersive overview of the field of Wearable computing that is solidified by the impressive set of examples. I was simultaneously entertained as well as educated, and would highly recommend this book to anyone that is looking to get started with Wearables.”

- Nathan Blair, Software Engineer & Entrepreneur

Sanjay M. Mishra began programming in C on various flavors of Unix in the early 1990s. Over the years he has developed diverse software systems spanning web applications and services, messaging, VoIP, NoSQL databases, as well as mobile and embedded platforms. He has worked for companies such as Intertrust, Eyecon Technologies, CallSource, nVoc (formerly Sandcherry, Inc.) and the Starz Entertainment group.

Users Review

From reader reviews:

Frank Craver:

As people who live in the particular modest era should be up-date about what going on or info even knowledge to make all of them keep up with the era that is always change and advance. Some of you maybe can update themselves by looking at books. It is a good choice for yourself but the problems coming to an individual is you don't know what one you should start with. This Wearable Android: Android Wear and Google FIT App Development is our recommendation to make you keep up with the world. Why, because this book serves what you want and wish in this era.

Catherine Stevenson:

Now a day people that Living in the era where everything reachable by match the internet and the resources in it can be true or not require people to be aware of each facts they get. How many people to be smart in getting any information nowadays? Of course the answer then is reading a book. Reading through a book can help folks out of this uncertainty Information particularly this Wearable Android: Android Wear and Google FIT App Development book because book offers you rich info and knowledge. Of course the information in this book hundred per cent guarantees there is no doubt in it you know.

Robert Journey:

Nowadays reading books become more and more than want or need but also be a life style. This reading habit give you lot of advantages. The advantages you got of course the knowledge even the information inside the book this improve your knowledge and information. The knowledge you get based on what kind of book you read, if you want send more knowledge just go with knowledge books but if you want experience happy read one together with theme for entertaining such as comic or novel. Often the Wearable Android: Android Wear and Google FIT App Development is kind of book which is giving the reader erratic experience.

Diana Slama:

Do you have something that you prefer such as book? The publication lovers usually prefer to decide on book like comic, quick story and the biggest an example may be novel. Now, why not trying Wearable Android: Android Wear and Google FIT App Development that give your entertainment preference will be satisfied by reading this book. Reading habit all over the world can be said as the means for people to know world much better then how they react in the direction of the world. It can't be stated constantly that reading habit only for the geeky person but for all of you who wants to always be success person. So , for all you who want to start reading through as your good habit, you could pick Wearable Android: Android Wear and Google FIT App Development become your starter.
