Predictive Analytics with Microsoft Azure Machine Learning: Build and Deploy Actionable Solutions in Minutes By Roger Barga, Wee Hyong Tok, Valentine Fontama

Data Science and Machine Learning are in high demand, as customers are increasingly looking for ways to glean insights from all their data. More customers now realize that Business Intelligence is not enough as the volume, speed and complexity of data now defy traditional analytics tools. While Business Intelligence addresses descriptive and diagnostic analysis, Data Science unlocks new opportunities through predictive and prescriptive analysis.

The purpose of this book is to provide a gentle and instructionally organized introduction to the field of data science and machine learning, with a focus on building and deploying predictive models.

The book also provides a thorough overview of the Microsoft Azure Machine Learning service using task oriented descriptions and concrete end-to-end examples, sufficient to ensure the reader can immediately begin using this important new service. It describes all aspects of the service from data ingress to applying machine learning and evaluating the resulting model, to deploying the resulting model as a machine learning web service. Finally, this book attempts to have minimal dependencies, so that you can fairly easily pick and choose chapters to read. When dependencies do exist, they are listed at the start and end of the chapter.

The simplicity of this new service from Microsoft will help to take Data Science and Machine Learning to a much broader audience than existing products in this space. Learn how you can quickly build and deploy sophisticated predictive models as machine learning web services with the new Azure Machine Learning service from Microsoft.

Editorial Review

About the Author

Valentine Fontama is a Principal Data Scientist in the Data and Decision Sciences Group (DDSG) at Microsoft, where he leads external consulting engagements that deliver world-class Advanced Analytics solutions to Microsoft's customers. Val has over 18 years of experience in data science and business. Following a PhD in Artificial Neural Networks, he applied data mining in the environmental science and credit industries. Before Microsoft, Val was a New Technology Consultant at Equifax in London where he pioneered the application of data mining to risk assessment and marketing in the consumer credit industry. He is currently an Affiliate Professor of Data Science at the University of Washington. In his prior role at Microsoft, Val was a Senior Product Marketing Manager responsible for big data and predictive analytics in cloud and enterprise marketing. In this role, he led product management for Microsoft Azure Machine Learning; HDInsight, the first Hadoop service from Microsoft; Parallel Data Warehouse, Microsoft's first data warehouse appliance; and three releases of Fast Track Data Warehouse. He also played a key role in defining Microsoft's strategy and positioning for in-memory computing. Val holds an M.B.A. in Strategic Management and Marketing from Wharton Business School, a Ph.D. in Neural Networks, a M.Sc. in Computing, and a B.Sc. in Mathematics and Electronics (with First Class Honors). He co-authored the book *Introducing Microsoft Azure HDInsight*, and has published 11 academic papers with 152 citations by over 227 authors.

Users Review

From reader reviews:

Arnold Grigg:

Do you have favorite book? Should you have, what is your favorite's book? E-book is very important thing for us to learn everything in the world. Each book has different aim or maybe goal; it means that reserve has different type. Some people experience enjoy to spend their time for you to read a book. They are really reading whatever they take because their hobby is usually reading a book. Think about the person who don't like reading a book? Sometime, particular person feel need book if they found difficult problem as well as exercise. Well, probably you will require this *Predictive Analytics with Microsoft Azure Machine Learning: Build and Deploy Actionable Solutions in Minutes*.

Joshua Lippert:

Book is actually written, printed, or descriptive for everything. You can learn everything you want by a reserve. Book has a different type. As it is known to us that book is important factor to bring us around the world. Close to that you can your reading ability was fluently. A publication *Predictive Analytics with Microsoft Azure Machine Learning: Build and Deploy Actionable Solutions in Minutes* will make you to become smarter. You can feel a lot more confidence if you can know about every little thing. But some of you think in which open or reading a book make you bored. It is not necessarily make you fun. Why they might be thought like that? Have you seeking best book or appropriate book with you?

George Degregorio:

This Predictive Analytics with Microsoft Azure Machine Learning: Build and Deploy Actionable Solutions in Minutes book is not really ordinary book, you have after that it the world is in your hands. The benefit you obtain by reading this book is definitely information inside this reserve incredible fresh, you will get info which is getting deeper you read a lot of information you will get. That Predictive Analytics with Microsoft Azure Machine Learning: Build and Deploy Actionable Solutions in Minutes without we realize teach the one who reading through it become critical in considering and analyzing. Don't become worry Predictive Analytics with Microsoft Azure Machine Learning: Build and Deploy Actionable Solutions in Minutes can bring any time you are and not make your carrier space or bookshelves' become full because you can have it in the lovely laptop even mobile phone. This Predictive Analytics with Microsoft Azure Machine Learning: Build and Deploy Actionable Solutions in Minutes having good arrangement in word along with layout, so you will not really feel uninterested in reading.

Frank Quintana:

Hey guys, do you wants to finds a new book to learn? May be the book with the title Predictive Analytics with Microsoft Azure Machine Learning: Build and Deploy Actionable Solutions in Minutes suitable to you? The book was written by well-known writer in this era. The actual book untitled Predictive Analytics with Microsoft Azure Machine Learning: Build and Deploy Actionable Solutions in Minutes is the main one of several books that will everyone read now. This particular book was inspired lots of people in the world. When you read this reserve you will enter the new way of measuring that you ever know just before. The author explained their thought in the simple way, thus all of people can easily to know the core of this e-book. This book will give you a large amount of information about this world now. So you can see the represented of the world within this book.
