Introduction to Medical-Surgical Nursing - E-Book By Adrienne Dill Linton

With just the right level of information to equip you to effectively care for adults and older adults, Linton's **Introduction to Medical-Surgical Nursing, 5th Edition** is the leading LPN/LVN text in its field. Covering both med-surg and psychiatric mental health conditions and disorders, it addresses your role in a variety of care settings, emphasizes culturally competent care and holistic nursing, and thoroughly covers all relevant NCLEX-PN Test Plan content. Abundant real-life case studies clearly show how to apply what you've learned to clinical practice.

- Features **separate chapters on common, high-profile disorders** (including hypertension, diabetes, and shock), providing an in-depth understanding for patient care.
- Offers **foundational units on basic concepts** related to the health care system, care settings, the nursing process, leadership, nutrition, the older adult, growth and nutrition, legal/ethical considerations, evidence-based nursing care, and many more essential topics, avoiding repetition later in the text
- Includes a separate, comprehensive unit on **the older adult and related disorders** — no other LPN/LVN med-surg text has as much coverage of this primary patient group.
- Includes a separate, comprehensive unit on **psychosocial responses to illness, psychiatric disorders, and substance abuse** — eliminating the need for a separate psychiatric mental health nursing text.
- Emphasizes **content related to the NCLEX-PN Test Plan**, including health promotion, nutrition, legal/ethical issues, HIPAA, and prevention of medication/medical errors.
- Offers **in-depth pharmacology coverage**: the *Pharmacology Tutorial* covers drug classifications, how drugs work, and nursing responsibilities; *Pharmacology Capsules* boxes provide medication information, precautions for use, interactions, and side/adverse effects; and *Pharmacology and Medications* tables in body systems chapters include classification, use/action, side/adverse effects, and nursing interventions — all with the goal of reducing medication errors on the job and equipping you to pass the NCLEX exam.
- **Assists with assignment and supervision**, helping you assign tasks to nurse assistants, patient care techs, and unlicensed assistive personnel, and making sure you understand the difference between delegation, management, supervision, and assignment of tasks on the health care team.

- Features ***Diagnostic Tests and Procedures*** tables for a quick reference to MRI, CT, Doppler flow, lumbar puncture tests for neurologic disorders, and much more.
- **Highlights timely information** with *Health Promotion* boxes, *Cultural Considerations* boxes, *Nutrition Considerations* boxes, and *Complementary and Alternative Therapies* boxes.
- Provides bulleted lists of **nursing instructions for Patient Teaching Plans**, stressing the role and responsibility of the LPN/LVN to reinforce patient education.
- Provides **consistent Nursing Care Plans** that reinforce the nursing process and focus on critical thinking, and *Put on Your Thinking Cap Critical Thinking* boxes encourage you to pause and consider the practical implications of what you have just read.
