S&P 500 Trading Strategy w/ConnorsRSI

Here's How You Can Swing-Trade for Short-term Gains AND Stay In Your Comfort Zone -- with S&P 500 Stocks

Professional money managers have long bought quality stocks on pullbacks ... Now you can follow the same strategy -- using quantified research & ConnorsRSI

Trade in Your Comfort-Zone

Active traders are often advised to stay in their "comfort zone". Especially if they want to sleep at night.

In the U.S. Markets, that 'comfort zone' is most often found in S&P 500 Stocks. Here's why:

- The majority of U.S. money is traded by institutions & the majority of this money is pension and retirement money.
- The money managers of these funds often work under mandate to trade only "quality stocks"
- The companies in the S&P 500, with long histories of success, are generally considered to be the highest quality stocks available.

Now -- Here's What's New:

In the past, institutions used a 'Buy-and-Hold' strategy for their S&P 500 allocations.

More recently, professionals have looked for short-term weakness on individual S&P 500 stocks -- in order to buy short-term lows and sell when the price on that stock rises back to it's true value.

Now you can use this same approach -- with a new level of quantified accuracy -- using ConnorsRSI as your guide to finding short-term oversold S&P stocks.

Introducing: S&P 500 Trading with ConnorsRSI

This latest GuideBook, from our popular Connors Research Trading Strategy Series, will teach you the how to swing-trade S&P 500 stocks to capture short-term gains from mis-priced opportunities identified by ConnorsRSI.

The only quantified momentum oscillator, ConnorsRSI combines price, momentum, duration of the trend, and relative magnitude of the price change -- all in a single indicator.

ConnorsRSI gives you a quantified way to identify stocks most likely to reverse. And as you will see from the test results, especially on a percentage correct basis, trading S&P 500 stocks with ConnorsRSI can be an effective way to achieve growth within the comfort zone of the S&P 500.
