### The Human Anomaly By Tashi Alexander Javed

Several millennia ago, a revolutionary phenomenon occurred. A mysterious species arose out of nowhere with intelligence unlike any other species seen before. This new species would control the Earth with unprecedented power, but would retain little to no understanding of itself, its purpose and its relation to the grand scheme of the universe. It replaced these questions with myths, stories, and beliefs while remaining blissfully ignorant of its own potential. This dissonance would be the cause of ongoing disputes, conflicts, wars and false divisions, all stemming from the fact that our very origins are unknown. This work explores our collective history, belief systems, religions and scientific theories to shed light on this strange territory known as the human condition.
