Editorial Review

From Library Journal

This book is about the history of geology and its theories. Carey, long-time professor in Tasmania, reviews the problems seemingly always encountered when new ideas (whether about fossils or mountain building) displace old ones. An early adherent of the idea of continental movement over the earth's surface, Carey ascribes such movement to an expanding earth rather than to movement over its own substrata, as is generally accepted. There is an amazing amount of information for general readers to devour in this fine volume. (Illustrations not seen.) R.G. Schipf, Univ. of Montana Lib., Missoula

Users Review

From reader reviews:

George Clark:

What do you concentrate on book? It is just for students since they are still students or that for all people in the world, exactly what the best subject for that? Merely you can be answered for that concern above. Every person has several personality and hobby for every single other. Don't to be forced someone or something that they don't would like do that. You must know how great along with important the book Theories of the Earth and Universe: A History of Dogma in the Earth Sciences. All type of book would you see on many options. You can look for the internet methods or other social media.

Jeff Sanchez:

Information is provisions for those to get better life, information today can get by anyone at everywhere. The information can be a know-how or any news even restricted. What people must be consider when those information which is from the former life are difficult to be find than now could be taking seriously which one is appropriate to believe or which one typically the resource are convinced. If you get the unstable resource then you obtain it as your main information you will see huge disadvantage for you. All those possibilities will not happen inside you if you take Theories of the Earth and Universe: A History of Dogma in the Earth Sciences as your daily resource information.

Dona Cole:

Spent a free time for you to be fun activity to try and do! A lot of people spent their sparetime with their family, or their own friends. Usually they accomplishing activity like watching television, going to beach, or picnic inside park. They actually doing same thing every week. Do you feel it? Do you wish to something different to fill your current free time/ holiday? Might be reading a book is usually option to fill your free time/ holiday. The first thing you ask may be what kinds of reserve that you should read. If you want to consider look for book, may be the book untitled Theories of the Earth and Universe: A History of Dogma in the Earth Sciences can be very good book to read. May be it is usually best activity to you.

Bruce Davis:

Does one one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Try and pick one book that you find out the inside because don't assess book by its deal with may doesn't work here is difficult job because you are frightened that the inside maybe not since fantastic as in the outside appear likes. Maybe you answer might be Theories of the Earth and Universe: A History of Dogma in the Earth Sciences why because the excellent cover that make you consider in regards to the content will not disappoint anyone. The inside or content is definitely fantastic as the outside as well as cover. Your reading 6th sense will directly direct you to pick up this book.
