By Christian Werthmann

**Green Roof: A Case Study: Michael Van Valkenburgh Associates' Design For the Headquarters of the American Society of Landscape Architects** By Christian Werthmann

The benefits of green roofs are many: longer roof lifespan, greater sound insulation, reduced heating and cooling system needs, and a cutback in storm water runoff. Green roofs decrease carbon dioxide and increase oxygen in cities, making them cooler in the process and reversing the so-called "urban heat island effect." In short, green roofs are the great green hope of many environmentalists, politicians, and architects interested in more efficient and environmentally aware buildings. From a design standpoint, however, there is less consensus. While some see the roof garden as a visual statement using plants, geometric lines, and sculptural elements, others believe concerns for sustainability should outweigh visual appeal. A green roof that combines aesthetics and mechanics has become the goal of many a landscape architect.

To address this quandary, the American Society of Landscape Architects (ASLA) commissioned renowned landscape architects, Michael Van Valkenburgh Associates in collaboration with the Conservation Design Forum to design a 3,300-square-foot green roof garden for its Washington, D.C. headquarters. In *Green Roof Gardens*, author Christian Werthmann uses this detailed case study to explain the history, methodology, and design process of green roof garden construction, providing a rich source of inspiration and technical knowledge for anybody interested in this simple solution to many of the environmental challenges we face today.

Why, because this book serves what you want and want in this era.

#### **Alberto Alvarez:**

The actual book Green Roof: A Case Study: Michael Van Valkenburgh Associates' Design For the Headquarters of the American Society of Landscape Architects has a lot associated with on it. So when you check out this book you can get a lot of help. The book was written by the very famous author. Tom makes some research just before write this book. This kind of book very easy to read you will get the point easily after scanning this book.

#### **Ann Walsh:**

As a scholar exactly feel bored in order to reading. If their teacher inquired them to go to the library in order to make summary for some reserve, they are complained. Just tiny students that has reading's heart and soul or real their passion. They just do what the educator want, like asked to go to the library. They go to there but nothing reading very seriously. Any students feel that examining is not important, boring as well as can't see

colorful photographs on there. Yeah, it is for being complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore this Green Roof: A Case Study: Michael Van Valkenburgh Associates' Design For the Headquarters of the American Society of Landscape Architects can make you feel more interested to read.
