Home Computer Networking: Creating Your Own Home Network By Noah Daniels

Today networking has become a necessity to thousands of computer owners and it's not a technological novelty anymore. The idea of having multiple computers networked together is not a new one. A networked system can save storage space on the hard drive and increase the operational speed on some machines. Space killing programs can be put on one computer that you can network to another computer saving precious memory on the main computer for more important things.

There are several options in home networking and each choice gives you certain advantages that others will not. This text will show you the different options and let you make an informed decision of which networking system is best for your needs. The networking system that you choose can optimize the speed of your system and give you a myriad of options like increased storage and the ability to load and use large programs at will.
